JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface / committees / acknowledgements vii
Contents ix

Section 1. Nucleation

Kinetics of transient nucleation in glass-forming liquids: a retrospective and recent results (*Invited lecture*)
I. Gutzow, J. Schmelzer and A. Dobreva 1
Crystallisation of silicate and phosphate glasses (*Invited lecture*)
P.F. James, Y. Iqbal, U.S. Jais, S. Jordery and W.E. Lee 17
Adiabatic nucleation in glasses, polymers and liquid metals (*Invited lecture*)
E. Meyer 30
Kinetics of the μ-cordierite crystal nucleation on polished cordierite glass (*Invited lecture*)
V.M. Fokin, N.S. Yuritsin, V.N. Filipovich and A.M. Kalinina 37
Metastable phases in lithium disilicate glasses (*Invited lecture*)
E.D. Zanotto 42
Diffuse interface model of crystal nucleation (*Invited lecture*)
L. Gránásy 49
Anomalous birefringence in nucleated $Li_2O \cdot 2SiO_2$ and $Na_2O \cdot 2CaO \cdot 3SiO_2$ glass melts
J. Deubener, F. de Moraes and R. Brückner 57
Influence of water on nucleation kinetics in silicate melt
M.J. Davis, P.D. Ihinger and A.C. Lasaga 62
Nucleation of Li_2O–SiO_2 glass and its interpretation based on a new liquid model
R. Ota, N. Mishima, T. Wakasugi and J. Fukunaga 70
Test of the adiabatic nucleation theory in metallic and chalcogenide glasses
V. de Barros Brasil and E. Meyer 75
Heterogeneous nucleation in photosensitive glasses
A.M. Kalinina, V.N. Filipovich and G.A. Sycheva 80
Amorphous phase appearance at Nb–Si interfaces
M. Zhang, Y.F. Xu and W.K. Wang 84

Section 2. Crystallization

Crystallization kinetics and the JMAK equation (*Invited lecture*)
M.C. Weinberg, D.P. Birnie III and V.A. Shneidman 89
Monte Carlo simulation of non-equilibrium segregation during crystal growth (*Invited lecture*)
K.A. Jackson, K.M. Beatty and M.V. Minke 100
Surface nucleation in cordierite glass (*Invited lecture*)
R. Müller 110

Dissolved gases and minor component effects on glass crystallization (*Invited lecture*)
G. Völksch and K. Heide 119
Crystallization of magnesium aluminosilicate glasses (*Invited lecture*)
I. Szabó 128
Electrochemical nucleation for the preparation of oriented glass ceramics
R. Keding and C. Rüssel 136
Elastic stresses in surface crystallization of glasses: phase transformations at spike tips
J. Möller, J. Schmelzer and I. Gutzow 142
Crystallization behavior in the glass system SiO_2–P_2O_5–Al_2O_3–MgO–Na_2O
T. Aboud and L. Stoch 149
Crystallization and corrosion resistance of amorphous FeCuNbSiB
C.A.C. Sousa and C.S. Kiminami 155
Spectroscopy and crystallization behavior of Eu^{3+}-doped La_2O_3:B_2O_3 binary glasses
A.C. Vaz de Araújo, I.T. Weber, B.S. Santos, B.J.P. da Silva, R.P. de Mello Jr., S. Alves Jr., G.F. de Sá and C. de Mello Donegá 160
Neodymium concentration dependence of thermo–optical properties in low silica calcium aluminate glasses
M.L. Baesso, A.C. Bento, A.A. Andrade, T. Catunda, J.A. Sampaio and S. Gama 165
Phase transformation in Nb–16 at.% Si processed by high-energy ball milling
M.N.R.V. Perdigão, J.A.R. Jordão, C.S. Kiminami and W.J. Botta F. 170
Crystallization of ZrF_4–LaF_3–AlF_3 glasses
S.J.L. Ribeiro, Ph. Goldner and F. Auzel 176
A test of the Hrubÿ parameter to estimate glass-forming ability
A.A. Cabral Jr., C. Fredericci and E.D. Zanotto 182
Crystallization of fluorindate and fluorogallate glasses
R.E.O. Diniz, S.J.L. Ribeiro, Y. Messaddeq, G. Ghiselli and L.A. Nunes 187

Section 3. Glass-ceramics

Biocompatible and bioactive glass-ceramics – state of the art and new directions (*Invited lecture*)
W. Höland 192
Glass ceramics: state-of-the-art (*Invited lecture*)
W. Pannhorst 198
CdTe quantum dots by melt heat treatment in borosilicate glasses (*Invited lecture*)
L.C. Barbosa, V.C.S. Reynoso, A.M. de Paula, C.R.M. de Oliveira, O.L. Alves, A.F. Craievich, R.E. Marotti, C.H. Brito Cruz and C.L. Cesar 205
Oriented crystallization of glass. A review (*Invited lecture*)
C. Rüssel 212
Nanocrystalline non-alkali glass-ceramics
L.R. Pinckney and G.H. Beall 219
